REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: No prior art has been found or presented that either teaches or fairly suggests the production of a laminated structure comprising a first substrate, a second substrate, and a pressure sensitive hot melt adhesive bonding the first substrate and the second substrate to one another, wherein the adhesive includes an amorphous poly-alpha-olefin and a crystalline polypropylene having a degree of crystallinity of at least about 40%, said amorphous poly-alpha-olefin comprising a butene-1 terpolymer or copolymer that may be produced with ethylene and propylene comonomers, as recited and claimed. The specific recitations of molecular weights for the components, and the melt index for the blend composition are neither anticipated, nor rendered obvious, by the teachings of the reference to Tsurutani et al, although that reference teaches the use of 1-butene copolymers admixed with polypropylene. Since there are no other outstanding issues with regard to the clarity or enablement of the claims, these claims are deemed to contain allowable subject matter.

The references to Karandinos et al and Brant, both newly cited of interest, teach the manufacture of polymer blends of polypropylene with an alpha-olefin copolymer, as claimed. While the reference to Karandinos teaches a blend of polypropylene, an amorphous poly alpha olefin is not shown specifically. Note the Summary beginning at column 4. while Brant shows the contemplated poly alpha olefin, the weight average molecular weight disclosed is too low to function in the instant invention. Note the Abstract.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nathan M. Nutter whose telephone number is 571-272-1076. The examiner can normally be reached on 9:30 a.m.-6:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James J. Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free)
